

No cross, no crown ----- September

Double holiday, double happiness

Before you know it, it's October. China's National Day is October 1st, and the Mid-Autumn Festival is August 15 of the lunar calendar. The Mid-Autumn Festival, one of the three most important holidays in China, is also a time for family reunions. Coincidentally, 2020's National Day coincides with the Mid-Autumn Festival. Therefore, China will take a holiday of eight days. From October 1st to October 8th, all members of Vector Optics will take time off. We will still take care of your requests.

To celebrate the Mid-Autumn Festival and National Day, Vector Optics also held a small party. Food and drinks were well prepared, all the staff were ready.

The celebrate party had three parts: Shanghai knowledge quiz, Guess the song and Dubbing competition. All employees were divided into two teams to compete with each other. On this special day, our employees sat together, sang songs, played games, and shared the happiness of reunion together, so that we did not feel lonely.

The atmosphere of the whole party was really warm, everyone had a good time. At last, on behalf of all the staff, we wish you, our old friends, all the best! Having a nice holiday!

Amazing! The sales record has been broken!

Another thing to celebrate is that Jamie broke the sales record in September!! She sold 20,000 pieces of Maverick in a single order, which is the order with the largest number of products sold since the establishment of Vector Optics.

Vector Optics specially opened a bottle of champagne for her to celebrate, which shared her joy.

There is no eternal victory, only permanent effort. Work hard and keep making progress!

Matiz ----- Great value for money!

September's live-streaming we introduced Matiz 3-9x40, as the the best selling scope in Matiz line, why 3-9x40 is so popular as a 1 inch scope?

As a 3-9x power 1 inch scope, Matiz has a really good performance on image. Just as the image shows below which is shoot by Matiz 3-9x 40. The image has a high degree of color reproduction and very little distortion which will never disappoint you in this price.

Matiz 3-9x40

3x

9x

Actually, one inch scopes are by far the most popular rifle scope. A big misunderstanding of 1 inch scope is about light transmission. Some people tend to buy a 30mm tube scope to get more light transmission, actually, light transmission has only little relation with tube diameter. Light transmission is more related to objective lens

diameter, magnification, coating and optical system. By the way, some people think 30mm scopes has better quality than 1 inch scope which is also a misunderstanding.

The complete live video and detailed introduction can be found on our official Facebook: www.facebook.com/tacbestvectoroptics. More information about Matiz can be found on www.vectoroptics.com. Place the order can go to our official online website www.vector2007.com.
